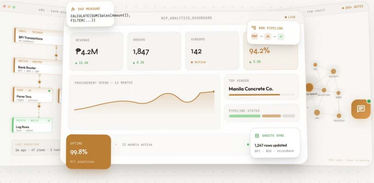
THE DATA ANALYTICS & AUTOMATION PORTFOLIO



Tools & platforms I work with daily

Monday.com · BPMN 2.0 · Power BI · Power Automate · n8n · Apps Script · Docker · Excalidraw · Claude · Gemini · Google Workspace · Microsoft 365 · Trello

WHO IS

Raymond Paredes

Data is more than just numbers, it reveals how you act as a company. Like any company we strategize and execute options differently from the competition landscape. The best way to see improvements is to create customizable workflows that adapt to better outcomes. Metrics that doesn't merely display the now but the information for the future progress.

— KEY NUMBERS —

40.0%+ PROJECTS FINISHED ON-TIME

15+ MANUAL WORK HOURS SAVED

50.0%+ ERROR REDUCTION

99.8% AUTOMATION UPTIME

32.0%+ PRODUCTIVITY EFFICIENCY

22.0%+ REVENUE GROWTH

TECH PREVIEW

Every company needs dashboards that drive 40%+ faster decisions

Most teams drown in spreadsheets while leadership waits weeks for reports. The companies that win are the ones where procurement spend, vendor performance, and budget variance are visible in real time — not buried in email threads. I build Power BI reports that pull from automated pipelines and structured knowledge vaults, turning raw data into decisions your team acts on the same day.

- **DAX optimization:** Sub-second loading on 100K+ row datasets — teams save **32% faster reporting cycles**
- **TMDL exports:** Version-controlled models — zero deployment errors, **100% audit-ready**
- **Drill-through pages:** Dynamic cross-filtering that cut stakeholder Q&A time by **50%**

20+ Dashboards delivered — each one replacing 15+ hours of manual reporting per month

AUTOMATION ENGINE

Every company loses 15+ hours/week to tasks a workflow could handle

Your team is copying data between tabs, chasing approvals over chat, and reformatting reports that should build themselves. The companies scaling faster are the ones that automated these bottlenecks yesterday. I build workflows that extract document data, trigger the right notifications, scrape the web for leads and products, and push clean structured data straight into your dashboards — saving **15+ manual** hours per week with **50%+ error reduction**.

- **Document Parsing:** PDF/OCR extraction for financial statements, invoices, receipts — **3x faster processing** vs. manual entry
- **Google Apps Script Integrations:** Gmail analysis, Calendar export, Tasks auto-sync — **zero missed follow-ups**
- **Real-time database sync:** Every update reflected instantly across all systems — **99.8% uptime**
- **Web scraping pipelines:** Firecrawl-powered lead gen and product research — **10x the coverage** of manual searching

50+ Workflows automated — each one eliminating hours of repetitive ops work per week

Raymond Paredes

DATA ANALYST · OPERATIONS ARCHITECT · PROCUREMENT LEAD

Data analytics specialist who transforms raw operational data into decision-ready dashboards and automates the manual processes that slow teams down. Based in Metro Manila, Philippines.

reiman.par@gmail.com · Manila, PH · Remote · LinkedIn

5+ Years · 30+ Projects · 50+ Workflows · 20+ Dashboards

Professional experience

A progression from procurement operations to data analytics and workflow automation leadership.

2024 — 2025

Data Analytics

IPM

- Developed and maintained BI dashboards, improving data accessibility by 40%.
- Automated data extraction and reporting processes, saving 15+ hours of manual work weekly.
- Performed statistical analysis to identify trends and inform project management strategy, leading to a 10% increase in work efficiency.
- Collaborated with cross-functional teams to define KPIs and deliver actionable insights that increased efficiency by 20%.
- Developed executive dashboard for operational metrics, enabling data-driven decisions that reduced overhead costs by 18%.

BI · DATA AUTOMATION · KPI REPORTING · ANALYTICS · DASHBOARDS

2021 — 2023

Admin Operations

IPM

- Streamlined document management system, reducing retrieval time by 60% and improving team productivity across 3 departments.
- Consolidated procurement workflows across multiple offices, achieving 25% cost savings through bulk purchasing agreements.
- Redesigned vendor onboarding process, cutting approval time from 2 weeks to 3 days while maintaining compliance standards.
- Implemented automated expense reporting system, saving 15 hours of manual processing weekly and reducing error rates by 40%.

OPERATIONS · PROCUREMENT · AUTOMATION · WORKFLOW

2018 — 2020

Procurement

IPM

- Created a database for managing vendors and price monitoring, identifying trends to negotiate a 10% buying price reduction.
- Built strong vendor relationships to secure faster delivery and trusted supply partnerships.
- Created a large-scale web scraping automation to find new lead suppliers, enabling procurement options without delay.

VENDOR MANAGEMENT · PROCUREMENT · DATA AUTOMATION · SUPPLIER SOURCING

Technical skills

Three core competency areas — analytics, automation, and data infrastructure.

Analytics & BI

- Advanced Power BI (DAX, M, TMDL)
- SQL (PostgreSQL, Supabase)
- Statistical trend analysis
- KPI engineering
- Excel & Google Sheets (advanced)

POWER BI · DAX · SQL · EXCEL

Automation & ETL

- n8n workflow orchestration
- Google Apps Script (Gmail, Calendar, Sheets)
- Python/Javascript/regex & OCR Document Parsing
- RESTful API integration
- Web scraping (Firecrawl, BeautifulSoup)

N8N · GAS · PYTHON · REGEX

Infrastructure & Knowledge

- Docker containerization
- Tailscale mesh networking
- MongoDB, Supabase, Nginx
- Obsidian vault architecture
- BPMN 2.0 & Mermaid diagrams

DOCKER · OBSIDIAN · BPMN · MERMAID

Education

BS Business Administration & Export Management

De La Salle College of Saint Benilde

Major in Business Analytics and Enthusiast in Operation Analytics

Class of 2017 · Verified

Ready to work together?

I'm open to project collaborations, full-time roles, and freelance opportunities in data analytics and workflow automation.
